

GUINCHO · CABO RASO STATION

Which forecast calls the real sessions?

The job is to call every day Cabo Raso was at 12 kt or more, and not call days that were too light. Extra wind is easy: you rig smaller.

FORECAST FROM YESTERDAY · 535 REAL SESSION DAYS

ICON7 matches real sessions best

93%

Real days caught

7%

Real days missed

16%

False calls

Cabo Raso had 535 real days. ICON7 caught 498 (93%). It missed 37 and called 95 days that did not blow. On the north wind (nortada), ICON7 matches best. On other directions, ICON13 does.

When the wind changes

Guincho's nortada is strongest from late spring to early autumn. Here is who matches real sessions in that wind, in other directions, and in those months.
